

CUSTOMER NEED

ADAPTIT efficiently solves the problems that telecom operators meet when changing to an All IP network but still have to serve customers with analog communication equipment like Utilities, State Organizations and Military Bases.

OFFERED SOLUTION

ADAPTIT's analog leased line extenders portfolio allows customers to switch from the analog telephone network to the operator's IP Network using existing terminal equipment.

BUSINESS BENEFIT

As a result initial investment is protected while the option to encrypt, previously unencrypted analogue leased lines is available.
