

## **Customer Need**

Greek R&D expansion created the need for LAB Testing Equipment that would be used to test performance of Mobile Network Equipment Portfolio

## **Offered Solution**

More than 50 Spirent Landslide test servers have been provided and installed customers' R&D in Athens. We offered Spirent Landslide products that emulate network functions and control and data plane traffic for millions of subscribers consuming IMS and over-the-top services in 5G, LTE, GSM, UMTS, eHRPD and Wi-Fi networks.

## **Business Benefit**

The advanced equipment platform is able to generate Real-Life Traffic Scenarios and emulate a variety of different Mobile Network Nodes. The advanced Landslide equipment ensure readiness for successful 5G rollouts. Landslide's emulation and testing capabilities support 3GPP release 13 and onwards, making Landslide ideal for validating the entire evolution path towards 5G.
